SHOUT

Make your viewers a part of the conversation with SHOUT™, ChyronHego's easy-to-use social media editor.

SHOUT is a software solution that lets broadcasters quickly air social media conversations, including those from Twitter®, Facebook®, Instagram®, YouToo™ and RSS feeds, using any ChyronHego Lyric-based graphics system - including Channel Box. In addition, Mass Relevance® subscribers can now insert data streams directly into SHOUT.

HERE ARE 5 REASONS YOU NEED SHOUT

1. Assign multiple supported data sources, such as Twitter feeds, Facebook posts, social content from Mass Relevance and RSS feeds to a single tab.

Easily set and output to air a variety of social media logos for instant viewer recognition.

2. Custom Moderator messages.

Insert your own custom messages at anytime.

3. Instagram Videos.

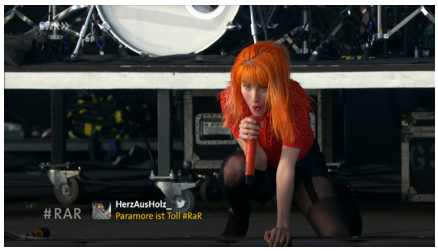
SHOUT now supports Instagram videos. Now, in additon to Instagram photos, SHOUT offers you another way to share your viewers' stories.

4. Embedded machine control.

Allows moderating & sequencing of multiple lists.

5. Choose and set language preferences of all SHOUT operations.

Operators can easily customize the user interface to their native language.



**NOTE: SHOUT 3.0 and later is purchased by annual subscription only. It is strongly recommended that SHOUT is installed on ChyronHego systems running Lyric PRO 7.0 or greater. For Channel Box systems, the recommendation for SHOUT compatibility is version 4.0 or greater.*
