

# GS2 MULTI-TOUCH

ChyronHego's powerful studio touchscreen product is the force behind some of the most highly responsive, technically advanced and visually impressive interactive presentation solutions in the television industry.

Based on a real-time broadcast graphics engine, optimised to handle the specific challenges posed by on-air interactivity, GS2 Multi-Touch offers a multi-layered development and delivery platform with unrivalled potential.

## HERE ARE 5 REASONS YOU NEED GS2 MULTI-TOUCH

- 1. A low-latency, high-bandwidth real-time broadcast touchscreen engine.**  
Never a trade-off between rendering performance and interactivity latency. Visually stunning projects can be created with no affect on real-time responsiveness.
- 2. Many tools in one.**  
Built-in telestration analysis and video server functionality.
- 3. Display agnostic.**  
GS2 Multi-Touch is compatible with all major touchscreen display technologies.
- 4. Outstanding video- and data-handling capability.**  
Up to 12 simultaneous HD inputs. Integrates with many third-party video servers, advanced 3D telestration systems, data providers, social media outlets and 3D modelling renderers.
- 5. A flexible software platform.**  
GS2 Multi-Touch is based upon open architecture and universal technologies. The same platform can be used to deploy any number of projects, whether they are for news or sports.
