

Virtual Football is a powerful, yet easy-to-use solution for inserting virtual graphics on the football (soccer) pitch or in-stadium via the primary camera as well as off-side cameras.

Virtual Football is a powerful, yet easy-to-use system for inserting virtual graphics on the football (soccer) pitch, or in-stadium via the primary camera as well as offside cameras. Based solely on advanced image processing, Virtual Football doesn't require camera sensors or special camera heads.

## HERE ARE 5 REASONS YOU NEED VIRTUAL FOOTBALL

- 1. Powered by advanced image processing.**  
Virtual Football doesn't require camera sensors or special camera heads. A built-in keyer is designed to overcome harsh environmental effects, such as shadows and bright sunlight.
- 2. Virtual Football comes with an array of tools designed to creatively enhance your live football production.**  
Tools include team or commercial logos on the pitch, distance to goals and defenders in a free kick situation, a built-in disc recorder for fast-turnaround off side lines replay, real-time ball speed and more.
- 3. Player Tracking integration.**  
Visualize player tracking graphics from multiple tracking systems, including ChyronHego's award-winning TRACAB system. Using TRACAB, you can show player tracking data both live and in replay.
- 4. Extremely quick to set-up.**  
Connect, Start and Go! Simply connect the video in and out, start the application, and follow the quick step-by-step set-up guide. It's that easy!
- 5. One Unified Platform.**  
ChyronHego's Virtual Football, Virtual Placement and Virtual 1st run on the same unified platform. Any one of these applications is just a click away. Save valuable time and money with ChyronHego's Unified Platform.
