

VistaCam™ is a complete, end-to-end solution for creating real-time panoramic video content suitable for large video walls in broadcast studio applications.

Consisting of an easy-to-use software application, the VistaCam Presentation Engine and a custom, ultra-high resolution 4-Camera Array, VistaCam provides an immersive in-studio experience for the at-home viewer.

## 5 REASONS YOU NEED VISTACAM

- 1. Remote operation.**

The camera array can be setup in-stadium and the feed can be sent back to the studio over IP. In the studio, the same operator that controls the studio cameras can also control VistaCam. This helps to ensure that the color balance and other settings match.
- 2. Small footprint.**

VistaCam is designed to fit unobtrusively into your production, requiring only 3-RU in the stadium and a small, mobile camera array.
- 3. Quick setup.**

VistaCam can be installed, calibrated and ready for air within 2-hours.
- 4. Feeds over the Internet.**

VistaCam lets you stream your video in full HD back to the studio over IP, allowing expensive video feeds to be kept free for other uses.
- 5. Tools to ensure error-free production.**

VistaCam has a built-in time slip function that allows the user to monitor the live feed and protects against any errors going out on air.
